## Industrial Laundry Tag

### 1 PRODUCT DESCRIPTION

The patented (US Patent # 7,928,922) **TROI L-71L Embeddable Industrial Laundry** RFID tag provides automatic identification and tracking capabilities never-before available in such a unique package designed for rugged or hazardous conditions. It can withstand unprecedented high temperature (consistent temperatures of 200 degrees Centigrade), high pressure and severe environmental conditions.

The **L-71L** is laundry-rated for 180 deg C industrial wringers (normal wringer is 140 deg C) and continues (for over a year) to successfully meet the needs of an industrial laundry facility; washing + drying + wringer + autoclave.

### 1.2 DIMENSIONS

Length = 175 mm

Wire diameter = 2.5 mm

**NOTE:** For the center 9 mm of the tag, the chip diameter is 4 mm

#### PLAN VIEW

In the picture below, the L-71L tag is in the top of the picture; the synthetic sleeve is in the bottom of the picture.

The L-71L RFID tag is shipped from the factory with the tag inserted into the synthetic sleeve.

### 1.3 COMPARISON TO CC-71 RFID TAG

While **TROI's CC-71 Embeddable** RFID tag and **L-71L Industrial Laundry** RFID tag are very similar, there are differences – size being the most telling.

In the photo below, the **CC-71** is on the top, and the **L-71L** is on the bottom; notice the wire diameter differences, as well as the chip-area diameters. And, the **L-71L** is more “pliable” than the **CC-71**.
